

National Park Service Inventory and Monitoring Division

Part-Time Student Hourly Positions Available

Natural Resources Inventory Data Evaluation and Management Technicians

Selected students will work with CNHP and NPS to evaluate and manage baseline biological inventory data and products. The primary duties will be to process completed NPS Inventory and Monitoring (I&M) inventory product suites through a Standard Operating Procedure Quality Assurance Plan (QAP) required to certify that delivered data are of the highest quality. Once data are certified, the CNHP employees will work with NPS to ensure data products are loaded into the NPS Data Portal (IRMA) for broad distribution via the web to researchers, students, and the general public.

The CNHP employees will assist NPS in reviewing project reports for publication. These duties will require addressing questions/concerns with ecological and GIS cooperators on final report and final product formats. The CNHP employees will work to convert products in older data formats to the current formats. The NPS I&M staff and CNHP students will collaborate directly with NPS scientists to design and develop the database tools needed to maintain and analyze project related data. The two groups will work jointly to develop detailed requirements and work breakdown that will be documented in an internal project plan called the Quality Assurance Plan (QAP) and data portal SOP. Specifically, this includes evaluation and updating the Vegetation Mapping Inventory and Species Inventory data products certification process of the QAP. The CNHP employees will work closely with the NPS I&M Vegetation Mapping Inventory Program Managers, Species Inventory Program Managers, the IMD Deputy Chief for Science, and NPS Data information Staff.

Applications for this position are due February 18. To apply, you must be a matriculated CSU student. Please submit a resume, cover letter, and transcript. Positions will be paid \$11.35 per hour working part-time for approximately 10-20 hours per week during the semester. Schedules are very flexible and can be up to full-time during the summer months, if desired. One intern will be hired with a target start date of March 18, 2019, and another will be hired for the summer of 2019. NPS may choose to continue employment of interns into the fall semester of 2019.
