Anemone virginiana var. cylindroidea

How I spent my summer vacation

“*A. virginiana* is known in Colorado only from a single record, collected in the Cuchara Valley...likely extirpated. Our single specimen is immature and possibly misidentified. We note the record here to encourage people to look...”

Bill Weber, *Colorado Flora, Eastern Slope*

A. virginiana var. *cylindroidea*

Sienet, Arizona Chapter

John Hilty

A. virginiana var. *alba*

ANNOTATION LABEL

Anemone cylindrica A. Gray

(In Flora N. Amer., *A. riparia* is reduced to synonymy under *A. virginiana* var. *alba*, which comes no closer to Colo. than eastern Minn., according to FNA.)

Det. Bill Jennings, Jan. 2000

Univ. of Colorado Herbarium (COLO)

Huerfano Co.

ANNOTATION LABEL

Anemone riparia Fern.

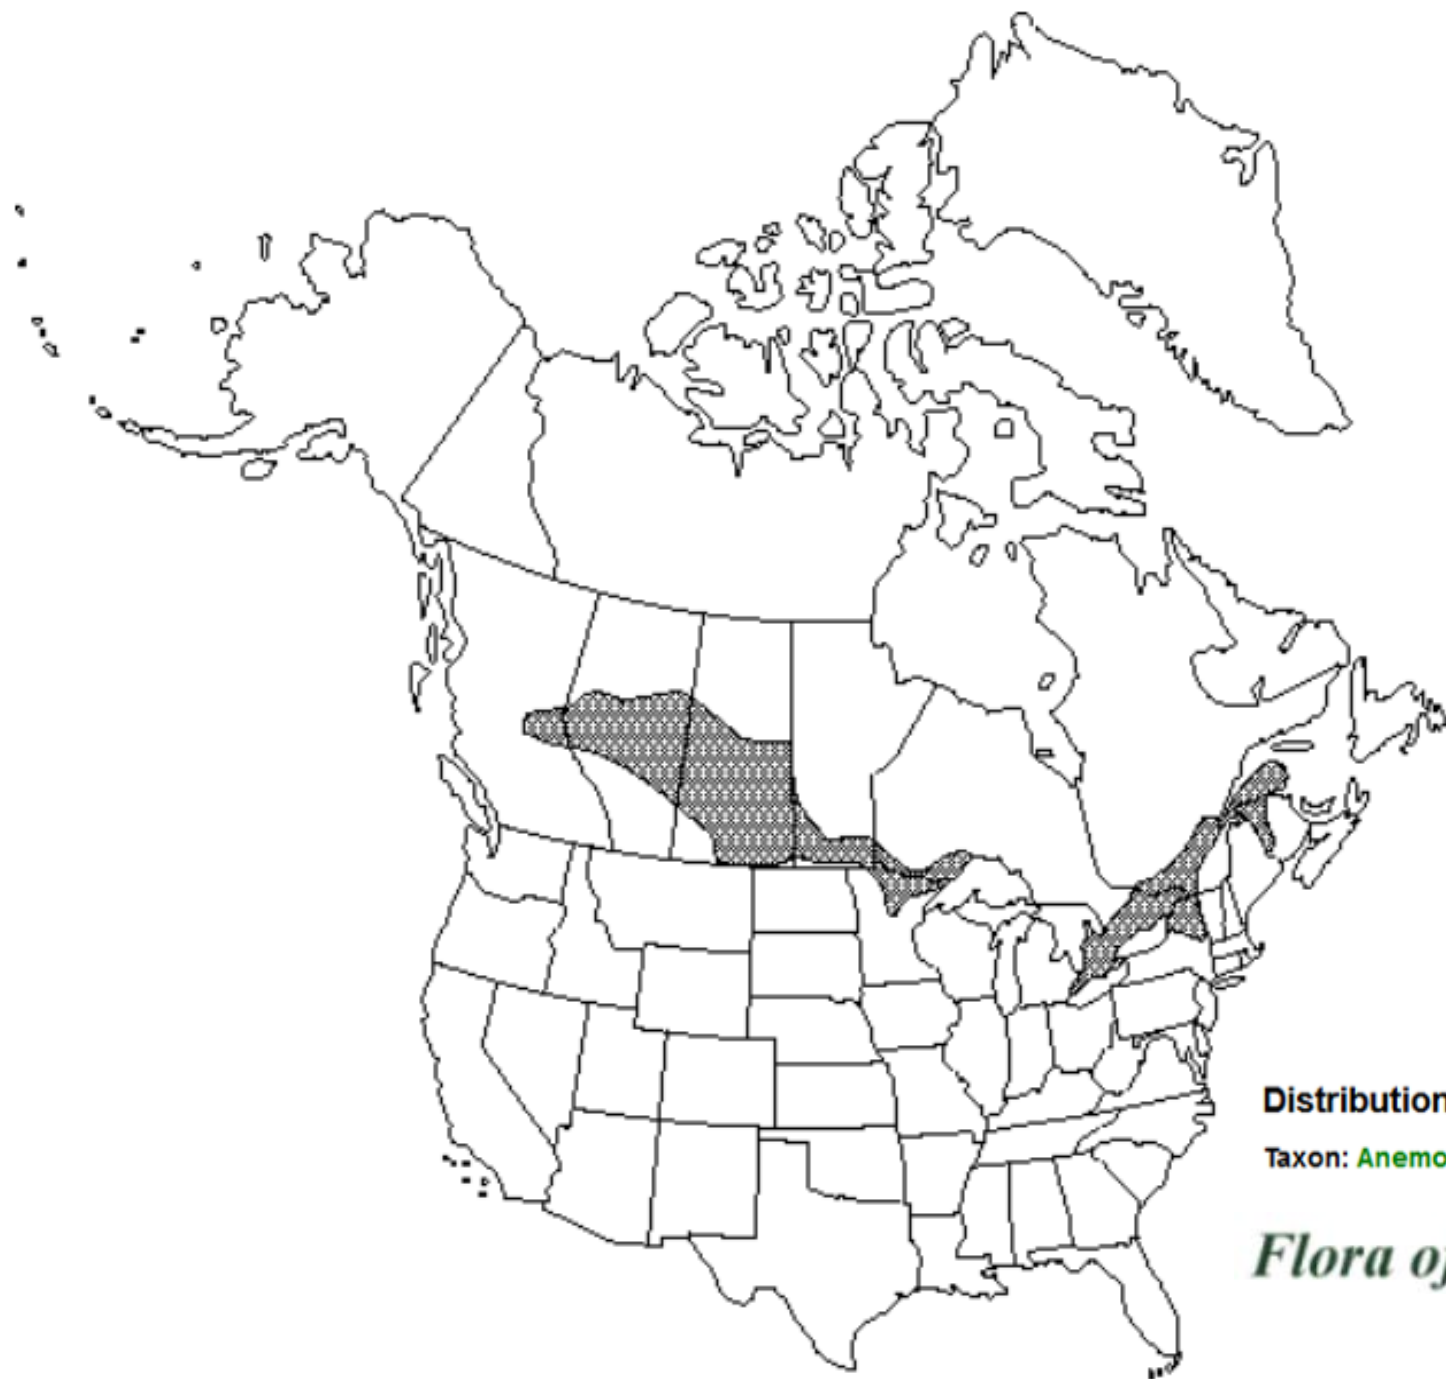

M. L. Heimbarger, Feb. 3, 1972.

^{*cylindrica* Gray}
~~Anemone globosa Nutt.~~

Cuchara Valley, Colorado--Edge of woods
and similar shady, moist situations.

715134

A. Virginiana var. cylindroidea

A. cylindrica

Anemone virginiana var. cylindroidea

Anemone cylindrica

- There is a great deal of variation and overlap in the taxonomy of *A. virginiana* and *A. cylindrica*. Look for secondary involucre on lateral pedicels.
- *A. virginiana* and *A. cylindrica* maintained the same phenology and often grow in proximity so field comparisons are possible....so is hybridization!

Shaded Foothill Canyons

Corylus cornuta Beaked Hazelnut

Aralia nudicaulis Wild Sarsparilla

Sanicula marylandica Black Snakeroot

Rubus parviflorus Thimbleberry

Populus tremuloides Aspen

Acer glabrum Rocky Mtn. Maple

Pseudotsuga menziesii Douglas Fir

Populations in three separate drainages

Herbarium Collections at CU and Kathryn Kalmbach
